

New!

The Eliminator Grinder™

Eliminator head.

Remove foreign material from your product with our revolutionary cutting system.

The Eliminator Grinder™ handles **fresh boneless and bone-in products** equally effectively. One piece of equipment does it all!

When it comes to the challenges of meat grinding, the Eliminator Grinder™ from ProSpection Solutions is the ideal solution.

What's makes the Eliminator Grinder different? Our grinder removes a whole range of unwanted

objects *during the grinding process*, including:

- Hard and soft plastic/polymer materials
- Metal objects
- Tendons and ligaments
- Blood clots and cartilage
- Bones and bone fragments

In a single process, you achieve the consistent high-quality that your customers demand and expect.

- Customizable parameters deliver the precise quality standards you require.
- Our system integrates easily with other equipment on your processing line.
- Remote, live-viewing monitoring capability is available.
- IP69K design and construction is built to last – with no knives or discs that require regular sharpening, either.
- Washdown and reassembly is completed in under 30 minutes!

Eliminator Grinder™: Technical Information

Processing speed:

6,000-12,000 lbs./hr. product capacity

Custom models also available.

Construction:

Type 304 stainless steel enclosure

IP69K-rated

Automatic dry-run protection in case meat supply is stopped

Operating requirements:

3 phase 480V/125A power

100 psi plant air

An Integrated Company ... with a heritage that dates back decades.

Cantrell•Gainco is one of America's leading manufacturers of systems and equipment for poultry first, second and further processing operations.

Among the many valuable equipment solutions we offer are our pacesetter wing segmenters and YieldPlus® debone/yield management systems. Plus, we're continually developing new products and systems that improve yields, quality and production efficiencies.

Strong technical expertise and service capabilities have made us value-added distributors of other top industry brands as well, including Borncut portion cutters, ProSpection Solutions systems, Anritsu X-ray detection systems, Mayekawa automated deboning equipment, and Fortress Technology metal detectors.
