

M6 METAL DETECTORS

Accurate

Reliable

Stable

Compact

THE INDUSTRY'S FIRST SIMULTANEOUS MULTI-FREQUENCY METAL DETECTOR

Anritsu metal detectors are precision engineered for dependable everyday performance in real-world production environments. Standard multiple frequency technology provides outstanding detection for a wide range of products, packaging and contaminants.

- ➤ Accurate: Anritsu's simultaneous multi-frequency technology has outstanding ferrous and non-ferrous metal detection within a broad range of food and pharmaceutical/nutraceutical products and packaging.
- ➤ Reliable: Anritsu metal detectors are designed, engineered and manufactured in Japan with rigorous attention to quality, detail and safety.
- ➤ Stable: Patented Advanced Signal Processing minimizes product effect for the best contaminant detection. The detection heads are resistant to environmental interference, noise and vibration.
- ▶ Compact: The industry's smallest multiple frequency system is perfect for tight lines, especially when configured as a combo with integrated checkweigher.

About Anritsu

Since pioneering simultaneous multiple frequency metal detection in 2004, Anritsu metal detectors have grown to become among the most installed in the world.

Founded in 1895, Anritsu is a billiondollar global powerhouse based in Japan with a legacy of innovation and meticulous engineering in electronics, telecom and testing.

Metal detectors are also available as combos, paired with Anritsu SSV checkweighers.

STANDARD FEATURES

- Simultaneous multi-frequency technology
- Easy product setup wizard
- 200 product presets
- Common user interface with SSV checkweighers and XR75 x-ray
- Tool-free fast belt removal
- Automatic belt tensioning (IP66)
- Guided troubleshooting & diagnostics
- Quick warm-up

- USB & Ethernet data output
- Data options: OPC-UA, EtherNet/IP, QUICCA3
- FOCUS function optimizes detection

^{*}Detection capability is dependent on head size and product/application factors.

Specifications are subject to change without notice

VERTICAL HEAD

Vertical metal detector heads provide ideal inspection of tall/upright packages like bottles and stand-up pouches.

LARGE/CASE

Inspect large-format products like cases and pet food bags.

The Anritsu Performance360 program provides comprehensive service, support and training, including:

- 24/7 technical support
- Remote support
- Preventative maintenance
- HACCP performance
- Radiation safety
